

# IFS for Engineering, Construction and Infrastructure

IFS Cloud is a powerful solution that your business grows into, not out of. It allows engineering, construction and infrastructure companies to home in on and perfect mission-critical functions and key areas for competitive advantage.

**General &  
Speciality  
Contractors**

**Property  
Developments**

**Modular  
and Prefab  
Manufacturers**

**Facilities  
Management**

## IFS Features for Engineering, Construction and Infrastructure

For your sector, Muzulu takes a project-centric approach, with tailored project management, finance, contract management and procurement tools sat at the heart. This enables a faster time to value at a better price.

IFS' supporting processes include HR, Expense Management, Extended Finance (Consolidation and Business Planning), Supply Chain & Inventory, Plant Hire and Offsite Manufacturing, and you can also choose from Muzulu's best of breed integrations. All deployed within a single product for seamless data flow and user experience.

### Single Source of Truth

Firm control at every stage, with real-time data enabling precise planning and costing.

### Flexible Contract Management

Manage complexities and change with full accountability and progress tracking.

### Product Lifecycle Management

Streamline and increase accuracy with complete financial and operational tools.

### Complete Asset Management

Cradle-to-grave asset lifecycle management to maximise value and increase the bottom line.

### Anywhere Service Management

From field service to remote assistance and depot logistics, use your resource intelligently.
