

IFS for Process Manufacturing

IFS Cloud is an unmatched tool for helping manufacturers progress technological roadmaps and transition to Industry 4.0. Whether it's connecting operational technology, IT and hardware, simplifying processes to achieve lean efficiency, enhancing compliance visibility, reinforcing supply chains against disruption or fine-tuning mission-critical operations, IFS meets the demand.

IFS Features for Process Manufacturing

IFS manufacturing solutions can support any mode of production. Whether your business engineers-to-order (ETO), configures-to-order (CTO), makes-to-order (MTO), makes-to-stock (MTS), makes-to-forecast (MTF) or employs mixed mode, custom or short product lifecycle manufacturing, IFS Cloud delivers.

It also performs key business functions, such as Customer Relationship Management and Service Management and manages corporate service functions like Financials and HR. IFS can also be readily integrated with your wider technology infrastructure.

360 Visibility

Draw on a complete picture with insights that enable agile, low risk moves.

Lean Production

Minimise production costs and maximises material availability for bottom line growth.

Data Accuracy

Advance accuracy in forecasting, price estimating and scheduling for optimised operations.

Quality Management

Embedded controls put quality assurance first at every stage of your production process.

Sustainable Solutions

Manage sustainability over a product lifecycle and supply chain with Eco-Footprint.

Why Muzulu for your Implementation or Upgrade?

Muzulu's team has a long history of helping manufacturers achieve business improvement through the successful deployment of IFS ERP solutions.

Our longstanding experience and sharp understanding of both IFS and digital transformation enablement means we are best placed to build a solution totally in sync with manufacturers' challenges and opportunities. We truly do understand every capability, quirk, best practice and optimisation, and all in the context of process manufacturing.
