

Voucher Genie

What is Voucher Genie?

Voucher Genie is a tool that automates the uploading of manual IFS financial vouchers from Microsoft Excel into IFS. It is the fastest way to get your vouchers into IFS and enables you to work faster, smarter and more efficiently.

The tool can be opened from the home ribbon in Excel. Because everything happens solely in Excel, Voucher Genie allows users to use just a single application to analyse and prepare their accrual and adjustment entries prior to uploading them into IFS.

In addition, Voucher Genie makes the process of uploading IFS financial vouchers from Excel a seamless one. Altogether, it can help businesses save both time and money, taking the hassle out of month-end reporting as well as reducing the risk of errors.

What are the main benefits of Voucher Genie?

Voucher Genie offers businesses a wide range of potential benefits. These include the following, in particular:

- ✓ Simplified accounting adjustments, saving time that can be spent on other tasks instead
- ✓ Improved data accuracy and reduced risk of errors
- ✓ Earlier and faster voucher validation
- ✓ Peace of mind that voucher data is correct and auditors are satisfied
- ✓ Makes it easier to input data in bulk into Excel, again saving time
- ✓ Simple to install into Excel
- ✓ Can potentially cut hours out of the month-end process, depending on business size

What features does Voucher Genie offer?

Voucher Genie makes it easier for users to create an accurate and comprehensive picture of their financial situation. It offers a range of features to simplify the month-end reporting process, including:

Consolidation of month-end accounting preparation

With Voucher Genie, Microsoft Excel is used to enter, build and calculate financial entries, saving time and effort as data does not need to be entered by hand into IFS itself. Voucher Genie therefore makes it far simpler to input adjusting entries in bulk.

Seamless generation of manual IFS financial vouchers

Manual vouchers can be uploaded directly from Excel to IFS, which eliminates the need for CSV files and manual importing. As a result, the entire process is considerably simpler and easier for users.

Error messages to alert users to inaccuracies

Where data is inaccurate, Voucher Genie will display a message in Excel so that users are able to rectify the problem. This makes the whole process of preparing IFS financial vouchers much more efficient and enhances accuracy.

How much does Voucher Genie cost?

Voucher Genie from Muzulu is available on a subscription basis, with both monthly and annual options available. Contact Muzulu today to discuss pricing.
