

Muzulu Security Accelerator: Revolutionising Cloud Security in IFS

Effortless Security Migration to IFS Cloud

Migrating from IFS Applications or another ERP system to IFS Cloud can be daunting. Your existing security model doesn't transfer, leaving you to rebuild security roles, align them with new projections, and validate segregation of duties from scratch. This process is often painstaking and error-prone, causing significant strain.

Muzulu's Security Accelerator eliminates this stress, saving you valuable time and effort. With a smart, structured approach and pre-configured libraries, Security Accelerator dramatically reduces the risk and complexity of implementing security on IFS Cloud. It helps you establish a robust, role-based security model early in the project lifecycle, ensuring it never becomes a roadblock.

Key Benefits of Security Accelerator

- **Pre-defined Security:** Pre-defined functional and end-user roles based on standard IFS business processes.
- **Save Time, Reduce Risk:** Avoid the traditional rework cycle and start testing earlier with a working security model already in place.
- **Built-in Best Practices:** Access a growing library of pre-defined end-user roles, built around standard IFS processes and segregation of duties.
- **Stay Up to Date:** Muzulu maintains the permission sets and roles with each new IFS Cloud release, ensuring you stay current without any headaches.
- **Bespoke Processes:** Bespoke processes can be incorporated into the security model following the Muzulu security framework to leverage the evergreen model.
- **Documented Security:** The security model is fully documented, supporting Audit and SOX requirements.
- **Flexibility:** Modify security definitions while maintaining the evergreen security model.

Why Choose Muzulu?

Our team of experts has decades of experience in delivering industry-leading IFS consultancy. We simplify processes, enhance functionality, and build resilience. Our unrivalled knowledge of IFS functionality ensures you get the most out of your new or existing IFS ERP solution.
